

Proform® Care

Guidelines to keeping your product in the best condition.

Framework

Mix mild soap and warm water together. Dampen a lint-free cloth lightly in the mixture. Clean the framework with the cloth. Use another dry, lint-free cloth to dry the area. Repeat as needed.

Leather

Keep out of direct sunlight so the leather doesn't fade or crack. To clean, use rubbing alcohol and water or vinegar and linseed oil. Use a lint-free cloth. Damp lightly it into your cleaning agent and gently scrub the stained area. Use a dry, lint-free cloth to dry the area. Repeat as needed.

Casters

Once a month, gently flip your chair over and carefully use tweezers to remove hair & debris out of the creases of each caster. Use a lint-free cloth with your preferred cleaning agent and clean the caster thoroughly. Thoroughly dry the caster with another lint-free cloth.
